## IN VIVO ANTIBODIES & REAGENTS FOR IN VIVO RESEARCH

### InVivoMAb™

- Antibodies formulated for in vivo application (but can also be used for in vitro)
- > 95% pure - verified via SDS-PAGE
- Low endotoxin levels (< 2 EU/mg)
- Azide and carrier protein free
- High concentrations (3-10 mg/ml)

#### Featured products

InVivoMAb anti-mouse PD-1 (CD279)  
InVivoMAb anti-mouse PD-L1 (B7-H1)  
InVivoMAb rat IgG2a isotype control, anti-trinitrophenol  
InVivoMAb anti-mouse CD4  
InVivoMAb anti-mouse CTLA-4 (CD152)

### InVivoSIM™

- Research-grade biosimilar monoclonal antibodies
- Exceptional Purity
- Ultra-low Endotoxin Levels
- Pathogen Free
- Low Protein Aggregation

#### Featured products

InVivoSIM anti-human PD-1 (Nivolumab Biosimilar)  
InVivoSIM anti-human PD-L1 (Atezolizumab Biosimilar)  
InVivoSIM anti-human PD-1 (Pembrolizumab Biosimilar)  
InVivoSIM anti-human C5 (Eculizumab Biosimilar)  
InVivoSIM anti-human TNF $\alpha$  (Adalimumab Biosimilar)

### InVivoPlus™

- Antibodies formulated to exceed the rigorous standards required for in vivo work
- > 95% pure - validated via flow cytometry, ELISA, and/or Western blot
- Ultra-low endotoxin levels (< 1 EU/mg)
- Aggregates validated at  $\leq$  5% via dynamic light scattering
- Murine pathogen free - screened using ultrasensitive qPCR

#### Featured products

InVivoMAb anti-mouse PD-1 (CD279)  
InVivoMAb anti-mouse PD-L1 (B7-H1)

### RecombiMab™

- Recombinant antibodies
- Exceptional purity - preservative, stabilizer, and carrier protein-free
- Binding validation
- Ultra-low endotoxin levels ( $\leq$  1EU/mg)
- Pathogen free - results are detailed on product-specific datasheets
- Low protein aggregation - guaranteed to be below 5% of the total protein

#### Featured products

RecombiMab anti-mouse PD-1 (CD279) (D265A)  
RecombiMab anti-mouse CTLA-4 (CD152)
